DESIGN CONSULT EXECUTE

GIVE YOUR CLIENTS WHAT THEY WANT.

Often clients ask for more than just pipe and drape for their event but don't have the budget for a custom set, no matter how simple. Our rental set packages help you deliver a custom experience at a rental price.

The rendering is already done: Built into the pricing is enough design time to tailor the drawing to your client's needs. Turnaround for a typical customization is 12 hours or less.

The pricing is already done: You already know what the set costs – you can run the price by your client and quickly determine their interest.

The engineering is already done: All packages are in Vectorworks and .DXF formats that your technical director can easily plug into the room layout.

The set is already done: All the structural components are complete. The package includes custom graphics and repainting or recovering of the set to better suit your event. Turnaround for repainting is one week or less.

Package 1: This works well for venues with high ceilings. It includes a soft screen surround that's rigged for RP, 2 25' transformits™, 3 hard star shapes, custom signs and a podium.

\$3,500.00 a week (local)

Package 2: This works well in smaller venues. The height is adjustable. Its biggest feature is a large backlit fabric panel in the center. With color faders you can change the color to cue. 2 - 9' x 12' screen surrounds, a large custom sign, custom stairs, a hard stage skirt and a podium round out this package.

\$3,770.00 a week (local)
