The Green Push Stick**

As the scraps get smaller so do the products. This is an improved version of the push stick we've been using for years. If you love using a tablesaw (and who doesn't) and you also love keeping all your fingers (I've still got mine) than this is an item for you. At 3/16" inches thick it's good for pushing thin stock through but strong enough for larger stock. It's got a nice large hook so you can hang it anywhere that's convenient.

Sure you could make your own but at 10 for \$5 why bother when we've done it for you?

These will soon be available in local (Mpls/St. Paul) wood working stores but if you want to buy them direct from us you're more than welcome.
